

DENTAL SPA

Worried about gum disease, bad breath, discoloured teeth?

50% of UK adults have gum disease and associated bad breath. Untreated gum disease leads to tooth loss and studies show it's more of a risk factor in heart disease than smoking!

A Dental Spa Session with Neil Harris kills the germs that cause gum disease using a unique combination of advanced equipment. It will leave your mouth feeling fresh, your teeth sparkling and gums healthy.

So why not spoil yourself or a friend and book in now to give your mouth a spring clean!

Saturday and evening appointments also available
